**New North American Sales and Service Provider for OrCAD Products**

Dear OrCAD customer;

To better serve the personal engineering market, Cadence is expanding the role of EMA as an OrCAD® distributor in North America. As of January 1, 2003, EMA will provide sales, support, and training for OrCAD products.

EMA, headquartered in Rochester, New York, is a full service value added reseller dedicated to the EDA marketplace. A Cadence distributor since 1998, EMA is staffed with experienced engineers and offers sales support, training, and technical support.

This move brings a number of changes in North America effective January 1, 2003:

EMA will handle sales of OrCAD products. Call 877-EMA-EDA1 (877-362-3321) or visit [www.ema-eda.com](http://www.ema-eda.com).

EMA will provide technical support, documentation, and product updates to OrCAD customers with maintenance agreements. Call 585-334-6001.

For more information on OrCAD products visit [www.orcad.com](http://www.orcad.com) or the OrCAD user community [www.orcadpcb.com](http://www.orcadpcb.com).

The staff at EMA is committed to making the transition as easy as possible. Please take a minute to visit — and bookmark — the EMA website as a resource for OrCAD products and information. As an incentive to take some time out of your schedule while you're there you can **enter to win a digital camera**. Find us at [www.ema-eda.com](http://www.ema-eda.com).

If you have any questions, please email us at [askorcad@cadence.com](mailto:askorcad@cadence.com).

Sincerely,

A handwritten signature in black ink that reads "Charlie Giorgetti". The signature is written in a cursive, flowing style.

Charlie Giorgetti
